

Press release Calendar Week 26/I

Safe on the roof Heed Rameder's tips and use its roof racks

At home, it is often hard to add more space, be it in the cellar, the attic or the garage. It's different on a car's roof, on which you can affix racks to carry bikes or canoes. At **Rameder's** website www.rameder.eu you will find many roof racks and tips for finding the right model and how to affix it.

Under [roof racks](#) **Rameder** provides you with an extensive documentation. Detailed illustrations explain the various ways of affixing racks. And you can enter your own car and all the right roof carriers will be displayed. Should you have any questions, you can always get in touch with the competent **Rameder customer service**.

But the right roof rack is only half the story. You also need something like a [bike carrier](#) to utilise its function in full. And you can even carry a canoe on the roof of your car! Needless to say that the right [holders](#) are also available from **Rameder**. To make their assembly easy, in the **Rameder Shop** you will not only find written instructions but also video clips. The data sheet will give you a summary of all the important information.

And www.rameder.eu will also have the right answers for you should you have any other automotive question.
